

Gaming Tribe RWD Released

November 1, 2014 — Dallas, Texas — The Mass Luminosity team have released the new Gaming Tribe RWD (Phase I) at www.gamingtribe.com. One primary feature of the responsive web design (RWD) is that it provides optimal viewing across a wide range of devices - from mobile phones to desktop computer monitors.

To accomplish this, the Mass Luminosity team had to redesign the entire Gaming Tribe experience and create a new tech-engine to drive the augmented functionalities. Phase II is expected to release in approximately ten days, completing the new user experience.

Many changes in style, functionality, features and interactivity have been incorporated as part of this upgrade. Mass Luminosity CEO, Angel Munoz, and VP of Social Media Technology, Teodor Atroshenko, discussed the changes at the GT Insider show (www.gtri.be/tv) on Sunday, November 2 at 3PM CDT.
